L'undicesima edizione del 'Rapporto sulle economie del Mediterraneo', curata da **Eugenia Ferragina** dell'Istituto di studi sulle società del Mediterraneo del **Consiglio nazionale delle ricerche** di Napoli (**Issm-Cnr**) ed edita dal Mulino, analizza - a vent'anni dalla Conferenza di Barcellona - criticità, differenze e similitudini dei 25 stati appartenenti a una delle aree strategicamente più rilevanti del globo: dalle cause degli attuali flussi migratori all'instabilità politica e istituzionale delle sponde Sud e Sud Est;

riconoscimento, ideato dal produttore Paolo Lubrano, va alla...

dalle fluttuazioni della disoccupazione all'erosione della ricchezza della classe media. Il Rapporto 2015

tra le economie della riva Nord e quelle della riva Sud del Bacino, in parte attribuibile al rallentamento dei processi di crescita che gli stati europei hanno subito in conseguenza della crisi del 2008", come spiega Ferragina. "Se si confrontano i dati relativi al Prodotto interno lordo pro capite in base ai dati aggiornati al 2013 - afferma **Alessandro Romagnoli** dell'Universita' di Bologna - risulta che il Pil pro-capite delle economie dell'area, in percentuale di quello italiano, si colloca per i Paesi mediterranei aderenti all'euro e Israele fra il 122 per cento della Francia e il 62 per cento del Portogallo e della Grecia, l'intervallo all'interno del quale si situano le economie balcanico anatoliche varia invece fra il 38 per cento della Croazia e il 10 per cento della Bosnia-Erzegovina, e su percentuali anche inferiori si attestano i Paesi arabi della riva Sud (Tunisia con il 13 per cento, Algeria con l'11 per cento, Giordania con il 10 per cento, Marocco con 9), ed Egitto, il cui Pil pro-capite e' il 5 per cento di quello dell'Italia".

Aumenta il Pil, non si riduce il rischio povertà

La distanza economica tra Nord e Sud rimane quindi un fattore caratterizzante del Bacino nonostante le prestazioni positive di cui le economie sud-orientali della zona sono state protagoniste ancora di recente. "L'Egitto ha visto aumentare il reddito nazionale lordo pro-capite dai 2.510 dollari del 2010 ai 3.140 del 2013, il Marocco da 2.870 dollari a 3.020, la Tunisia da 4.160 dollari a 4.200", ricorda **Marco Zupi** del Centro studi di politica internazionale (Cespi), e guardando i dati relativi alla povertà estrema tra le diverse aree del pianeta, "Nord Africa e Medio Oriente risultano in tutto il periodo considerato dagli obiettivi di sviluppo del millennio (cioè dal 1990 a oggi), la regione con la minor gravità dal problema, ma anche con meno miglioramenti". La popolazione che vive con meno di 1,25 dollari al giorno (valori 2005) nella sponda meridionale del Mediterraneo e' nel 2012 del 43%, mentre negli altri Paesi in via di sviluppo e' del 62%. L'aumento del Pil nelle aree sud e sud-est del Bacino, però, "non e' sufficiente a proteggere dal rischio di povertà e al contempo non esiste un sistema di welfare e di protezioni che rappresenti un'ancora di salvezza".

Allarme disoccupazione

Uno dei fenomeni che colpisce in modo trasversale tutta l'area e' quello della disoccupazione. "Certamente l'area che risente maggiormente del problema e' quella balcanica. La fascia che raggruppa invece il maggior numero di Paesi e' quella in cui il tasso e' compreso tra il 13,3 per cento (Tunisia) e il 9,2 per cento (Marocco). Dentro tale fascia troviamo Paesi diversi tra loro ma accomunati da una disoccupazione simile: Egitto, Giordania, Italia, Francia, Slovenia, Turchia, Algeria", conclude Zupi. Ad aggravare il divario e' invece il minor afflusso degli investimenti diretti esteri (Ide) nelle aree politicamente instabili. "I Paesi con le perdite piu' serie - nota Anna Ferragina dell'Universita' di Salerno - sta in termini di stabilita' politica che di flussi di Ide sono stati la Siria, la Libia, l'Egitto, l'Algeria e la Giordania. Gli Ide in Egitto, dopo il picco di 11,6 miliardi di dollari e il successivo collasso a 6,7 nel 2009, tre anni dopo non avevano ancora
